## SKILLS

**Programming**

- Python
- SQL
- C / C++
- JavaScript
- HTML / CSS
- Matlab

**Tools**

- Excel / Power BI
- Flask / Vue.js
- Git / Linux
- Agile / Scrum
- Driver's licence B

## LANGUAGES

Swedish — native
English — fluent
Mandarin — HSK 2

# INTISAR HIRABE

BSc Computer Engineering | Open to roles in Gothenburg and Stockholm

## PROFILE

Computer Engineering graduate from Örebro University (2025) with hands-on experience in Python, SQL, Power BI, and full-stack web development. I have built real tools used by real people from sales dashboards at IKEA to a clinical web application developed during an international research exchange in Germany. I learn fast, take ownership, and am looking for a data or tech role in Gothenburg where I can contribute from day one.

## WORK EXPERIENCE

**CTO** SoMe Startup *2026 – Present*

• Delegate tasks across the team and coordinate feature development from idea to deployment.

• Build and maintain product features, balancing speed of delivery with code quality.

**Sales Associate and Data Support** IKEA, Örebro *2022 – 2025*

- Built Power BI dashboards used by store management to follow weekly sales performance, replacing a manual reporting process.
- Cleaned and analysed sales data in Excel to identify trends and slow-moving products, which contributed to two promotional campaigns.
- Worked three years alongside full-time studies, developing the ability to communicate data findings clearly to non-technical colleagues.

**Image Reviewer** Transportstyrelsen *2022 – 2023*

- Reviewed and quality-assured visual material for road and traffic safety projects at a Swedish government agency.
- Ensured accuracy and clarity of visual information, working to strict quality standards.

## PROJECTS

**Thesis: Nightingale Project** Johannes Gutenberg University, Germany *Apr – Jun 2025*

- Built a quiz-based web application to improve cardiovascular disease awareness in an international clinical research environment.
- Full-stack: Python and Flask backend, Vue.js and Bootstrap frontend, working with real echocardiogram data to generate questions and feedback.
- Delivered independently during a research exchange abroad with minimal supervision.

github.com/shengli12/nightingale-bachelor-thesis

**Media Manager** Syntax Coding Society, Örebro University *2023 – 2024*

- Managed communications and digital content for the Computer Engineering student association.
- Grew the society's online visibility and increased engagement with student members.

## EDUCATION

**Örebro University** *Graduated August 2025*

BSc Computer Engineering

Relevant courses: Databases, Algorithms, Machine Learning, Software Development, Nonlinear Optimisation.
